FOLIA™ Mural System

Architect's and Designer's Specification Manual

What is the Folia™ Mural System?

The Folia-Mural System consists of wall mounted panels that display tiled images. They can be as small as a single panel of up to 47"W x 142"L in size all the way to large scale wall murals covering many hundreds of square feet. Each piece may be shaped to a specific contour as well as sized to fit within the entire assemblage.

Typical uses:

- Interior Murals
- Exterior Murals

Why the Folia-Mural System?

- Durable image imbedded in the substrate
- Environmentally friendly process
- UV, water and graffiti resistant
- 10-year limited warranty
- Easy to maintain
- Spectacular colors – Ask for a sample
- Personal Service: Specific Project Manager assigned for the length of each project
- Technical support available to you at all times
(for suggestions, advice and assistance with our Design Guidelines)
- Pre-Flight Department ensures complete accuracy of your graphic files
- In-house design department available to create visuals that will meet your needs

HOW TO SPECIFY & ORDER

1. Mural Size and Individual Component Panels

- While there is no practical limit to the total size of a Folia-Mural, the maximum size of individual panels is either 47"W x 119.5"L or 59"W x 143.5"L
- Attach sketch indicating overall mural size and those of the individual panels.

For assistance, contact your Sh[i] Representative or Project Manager.

2. Thickness of Panels

- Concealed mounting requires panes to be at least 1/2" thick, which is usually sufficient for most applications.
- Panels may be less than 1/2 thickness, depending on how the mural is being mounted.

3. Mounting Instructions

- Where are the panels being installed? Please indicate the mounting surface and any known structural conditions.
- Does this application require inserts, z-clips, etc? Panels are normally mounted using aluminum z-clip pairs. Large murals of many panels may require vertical stabilizing attachments between multiple panels.

4. Artwork

- Supply artwork per Sh[i] Design guidelines
- For assistance, contact your Sh[i] Representative or Project Manager.

Folia-Mural General Information

1. Proofing - Choose:

Paper Content Proofs

- 11" x 17" paper proofs are the most economical way to verify layout content.
- Larger layouts are reduced to fit the 11" x 17" printable area.

Full-Scale Paper Proofs

- Allows verification of content and legibility at full size.

Half-Scale Paper Proofs

- More economical than the full-scale, half-scale proofs allow accurate content verification.
- Best for large layouts with text that would be unreadable when reduced to 17" x 11".

PDF Paperless Proofs

Maintenance

Clean only with non-abrasive cleaners like Windex, water with mild soap, followed by a warm water rinse, and dry with a clean, soft cloth.

To remove graffiti, use "Disappear-Organic Graffiti, Adhesive and Paint Remover™" and, if shadows persist, use "Professional's Choice Shadow Max™". Rinse with warm water and dry with a clean, soft cloth.

Be careful to not damage the surface or its finish sheen by bearing down too hard or over-cleaning.
